EXPERIENCE

Front-end Developer

Reversso

May 2021 - September 2024

Led a comprehensive project to update the company's portal, used by more than 350 brands with close to 15,000 monthly users. Optimized the portal architecture, increasing speed and security, while improving accessibility for a more efficient experience.

Led the development of the new landing page, applying the latest brand standards and styles to ensure a better user experience.

Collaborated closely with the design team to develop and implement a design system adopted across all of the company's products. Created a library of internal components that has accelerated the interface creation process.

Technologies used: JavaScript, TypeScript, SASS/SCSS GraphQL, Styled-components, Storybook, ReactJs and NextJs

Web Developer

Freelance

August 2020 - October 2020

Developed and designed a landing page for a company in the electrical sector, which merged creativity and functionality to offer an impactful user experience. Highlighted the company's services and strengths through a modern and attractive design, while ensuring easy navigation for visitors.

Technologies used: TypeScript, TailwindCSS, NextJs, Figma and Vercel

SIDE PROJECTS

Classroom Evaluation Analysis Tool

October 2024 - Present

Developed a web application to facilitate teachers' management of standards-based assessments and analyze their results. The app provides early projections about the performance of each course and student during the grading period, identifying areas that need reinforcement and potential groupings of students based on their specific areas of need.

Technologies used: TypeScript, TailwindCSS, NextJs, NestJs, TypeORM, GraphQL, PostgreSQL, Figma, Railway and Vercel
